## Amphiro Digital Hand Shower

### The smart way to shower

Amphiro displays your hot water consumption while showering to promote a more conscious use of energy.

### Keep your consumption in check

Follow the evolution of your consumption and find trends over time in the free Digital Hand Shower app.

### Feeling good – doing good

With Amphiro, you actively contribute to the preservation of the planet's energy and water resources on a daily basis.

### Simply save energy

Real-time feedback on consumption results in yearly average savings\* of 22% on energy and 3,500 liters of drinking water per person.

### The device that pays for itself

By saving energy and water, you also save money. Real-time feedback helps save over 100€ on average for a typical household – every year.

## The Amphiro Digital Hand Shower

Perfectly balancing style, technology and durability, the Amphiro Digital Hand Shower uses real-time feedback to promote a more conscious use of energy.

Users stay in control of their energy and water usage thanks to the front-facing, colored LED, and get detailed insights from the LCD on the back of the device.

To access additional data and identify trends over time, users can simply download the free Digital Hand Shower app and connect their Amphiro Digital Hand Shower to their smartphone.

## Clear, clever, connected

Fits most commercially available shower hoses (hose not included).

No tools or plumbing knowledge required. Simply replaces current shower head.

No batteries needed. Harvests energy from the water flow.

Works with or without smartphone (from Bluetooth 4.0).

Did you know?

Showering for 1 minute uses as much energy as an average household\* for consumer electronics in one day.

\*Average household = 2.3 persons

Showering for 1 second uses as much energy as a full smartphone charge.

## amphiro b1 connect

amphiro b1 connect is an advanced, smart consumption meter that allows you to follow your water and energy consumption while you shower and beyond.

It connects to your smartphone via Bluetooth and lets you synchronise and evaluate the data in the dedicated Amphiro app.

The amphiro b1 connect is fitted between the hand shower and the hose, as an addition to the shower installation.
